Dentistry is our passion! It provides an ideal balance between art and science, and our desire to attain an amazing career in the healthcare profession where we can utilize our creative skills. Our “boutique” concierge style dentistry is laser-focused on being patient-centered, and providing the highest quality care using cutting-edge technology in an ultra-modern environment. As husband and wife, we share a vision to deliver comprehensive care while helping patients explore and implement dental and facial strategies to help improve their lives. Our ultimate goal is to meet and exceed patients vision of optimal health.

Our dedication to dentistry is evident with our consistent engagement in advanced training. From inception, following dental school, we both built our foundation with post-doctoral residencies to grant us a higher level of proficiency and acquire expertise in collaborating with our patient’s physicians to deliver outstanding dental care. Over the last twenty two years, as premium providers of IV “sleep”sedation, oral surgery including implants, and complex dentistry, we have been committed to staying abreast of the latest information and honing our skills through a variety of advanced continuing education training. Our proudest moment, came in 2015, becoming the first husband and wife duo to achieve the highest credential as Diplomates and Board Certified Implantologist by the American Board of Oral Implantology/ Implant Dentistry.

Our dental philosophy far exceeds traditional general dentistry. By implementing the most current and scientifically proven methods with the ultimate level of competency and experience, we can treat even the most complex dental issues. Whether patients are seeking dentistry as a preventative or needing extensive treatment, our experienced team can help them create “a smile for a lifetime”.

While clinical expertise and advanced technology are essential to obtaining superior results, it is our commitment to individualized care that truly sets us apart. We understand the unique needs of our patients, especially those in their golden years. We feel incredibly fortunate and honored that our patients have put their trust in us, to not only be a part of their personal healthcare, but also for their family and friends whom they continue to refer to our practice.

If you demand the best for your dental needs, we’d like to welcome you to Cherry Creek Dentistry—your new dental home.
